## FESTOON SUPPLY SYSTEMS

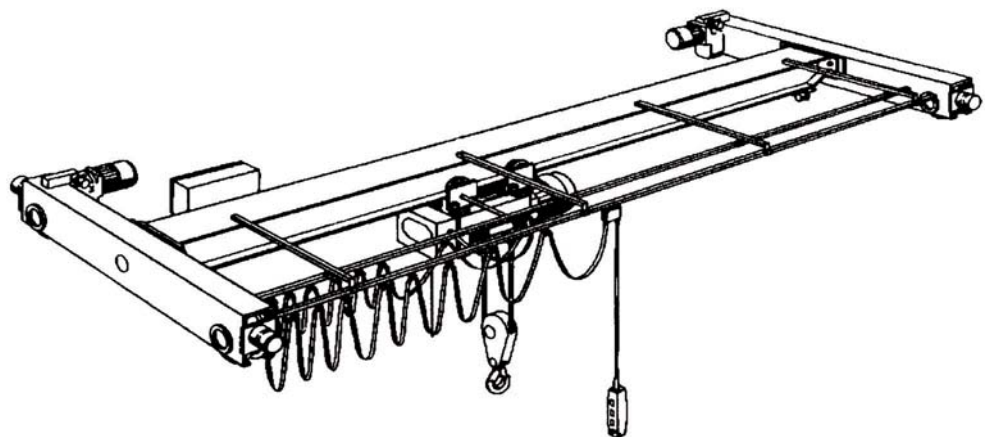

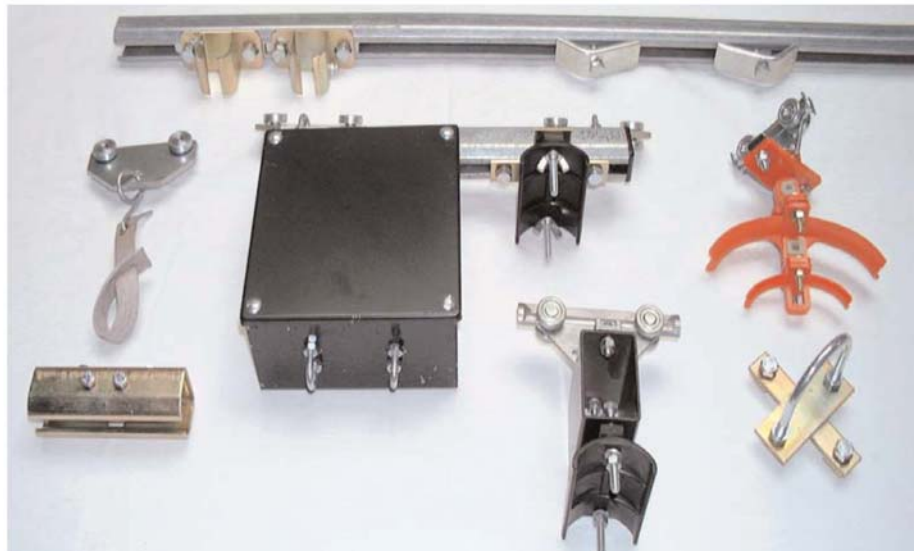

### Festoon Supply Systems

We offer a wide range of pneumatic / electric festoon systems for all our powered trolleys and crane kits.

This can be a simple taut wire with a power supply on a short swing jib, an independent pendant and mains supply, or even a custom designed multi station control system with a main supply, and exhaust system for air hoists.

We also offer Stainless Steel 'C' Track systems or trolley systems for use in an explosive atmosphere.

With a drawing and specification we are able to offer the right system for your requirement
